## NOTES TO FINANCIAL STATEMENTS

### Annual OPEB Cost and Net OPEB Obligation

a. Annual Required Contribution	\$	778,531
b. Interest on Net OPEB Obligation		12,401
c. Adjustment to Annual Required Contribution		-
d. Annual OPEB Cost (a + b + c)	\$	790,932
e. Less Contributions Made (premiums paid)		(605,452)
f. Change in Net OPEB Obligation (d + e)	\$	185,480
g. Net OPEB Obligation at beginning of year		1,347,934
h. Net OPEB Obligation at end of year (f + g)	\$	1,533,414
i. Annual OPEB Cost (charge to Income Statement)		790,932
j. Percentage of Annual OPEB Cost Contributed (e / d)		76.55%
k. Net OPEB Obligation at end of year (Balance Sheet Asset / Liability)	\$	1,533,414

### Funded Status

l. Total OPEB Liability (TOL)	\$	10,844,718
m. Fiduciary Net Position		-
n. Net OPEB Liability (l - m)	\$	10,844,718
o. Funded Ratio (Assets as a percentage of TOL) (m / l)		0.00%

### Actuarial Methods and Assumptions

Measurement Date		7/1/2020
Investment Rate of Return		
Expected Return on Plan Assets		N/A
Expected Return on Employer's Assets		0.92%
Rate of Compensation Increase		N/A
Inflation Rate		N/A

### Assumed Health Care Trend Rate

Initial Health Care Trend Rate		7.00%
Ultimate Health Care Trend Rate		3.00%
Year the Ultimate Rate is Reached		2030

### Additional Information

Actuarial Cost Method		Entry Age Normal
Amortization Method		Level Dollar
Amortization Period (Years)		15
Method Used to Determine Actuarial Value of Assets		N/A

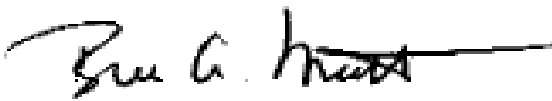

## STATEMENT OF ACTUARIAL OPINION

This report documents the results of the actuarial valuation of the San Leandro Unified School District Postretirement Medical Plan, using the Alternative Measurement Method, as described in Government Accounting Standards Board Statement No. 75 (GASB 75). Determinations for purposes other than meeting the Employer's financial accounting requirements may be significantly different from the results herein.

The results in this report are based on information and data submitted by the San Leandro Unified School District. An audit of the information was not performed, but in general the information supplied seems reasonable for the size and scope of the Employer and its working and retired population. The accuracy of these results depends upon the accuracy and completeness of the underlying information.

The valuation results summarized in this report involve actuarial calculations that require assumptions about future events. The San Leandro Unified School District selected certain assumptions, while others were the result of GASB 75 guidance and judgment. We believe that the assumptions used in this valuation are reasonable and appropriate for the purposes for which they have been used.

To the best of our knowledge, all calculations have been performed in accordance with the Alternative Measurement Method as described in GASB 75, requirements of applicable financial accounting standards. The procedures followed and presentation of results conform to generally accepted actuarial principles and practices. The actuarial credentials of the undersigned consultant of ALI Actuarial & Retirement Plan Services meet the Qualification Standards of the American Academy of Actuaries to render this Actuarial Opinion. There is no relationship between ALI Actuarial and the San Leandro Unified School District that impairs our objectivity.

## ACTUARIAL METHODS AND ASSUMPTIONS

<b>Measurement Date</b>	July 1, 2020
<b>Participant Data</b>	Supplied by Employer
<b>Fiscal Year</b>	July 1, 2020 to June 30, 2021
<b>Actuarial Cost Method</b>	Entry Age Normal Cost Method
<b>Valuation Method</b>	As prescribed by GASB No. 75
<b>Asset Valuation Method</b>	Not Applicable.
<b>Nature of Actuarial Calculations</b>	<p>The results documented in this report involve estimates and assumptions about future events. Certain plan provisions may be approximated or deemed immaterial, and, therefore are not valued. Assumptions may be made about demographic data or other factors. Reasonable efforts were made in this valuation to ensure that significant items of actuarial liabilities are treated appropriately.</p> <p>Future experience will likely differ from the assumptions used in these calculations. As these differences arise, the expense for accounting purposes will be adjusted in future valuations to reflect experience.</p> <p>A range of results different from those presented here could also be considered reasonable. The numbers are rounded to the nearest whole dollar for convenience.</p>

---

## ACTUARIAL ASSUMPTIONS

<b><u>Discount Rate</u></b>	0.92%
<b><u>Mortality</u></b>	1984 Unisex Mortality Table.
<b><u>Disability Rate</u></b>	None Assumed.
<b><u>Turnover Rate</u></b>	None Assumed.
<b><u>Retirement Age</u></b>	For active employees, age 60 with 20 years of service.
<b><u>Health Care Trend Rate</u></b> <i>(applies to retirees only)</i>	7.00% is rate of increase next year. 3.00% is ultimate rate of increase. 2030 is the year ultimate rate is reached.
<b><u>Retiree Contribution Trend Rate</u></b>	Same as Health Care Trend Rate.
<b><u>Participation Assumption</u></b>	All participants are assumed to elect coverage at retirement.
<b><u>Retiree Lapse Rate</u></b>	None.

Beginning in 2018, we also added an allowance for the Minimum Employee Contribution (MEC) under PERS. The annual MEC is currently \$110.10. This is assumed to increase at 3.00% per year and is also assumed to increase another 1/20 each year as the contribution requirement accrues.

---

## SUMMARY OF ELIGIBILITY AND COVERAGE

It is not possible to describe every retiree medical plan option in this report. The following summarizes the major provisions and options.

Medical benefits are available to retired employees of the San Leandro Unified School District. The District pays a portion of the monthly health insurance premium. Different reimbursement rates apply to different employment backgrounds, including:

CSEA employees hired before July 1, 1996 (\$1,200 annual benefit);  
Teamsters hired before January 1, 1997 (\$1,000 annual benefit);  
SLTA employees hired before June 15, 1985 (retiree-only single premium); and  
Management employees hired before June 15, 1985 (retiree-only single premium).

Retiree medical benefits are also provided to some active employees who were grandfathered in to their plan at the time. This includes some members of CSEA, SLTA, and Teamsters. Retirees are eligible to have their health premiums paid when they retire. They may retire at the later of age 55 with 10 years of participation, or after age 55 if total age + service points equals 75. Other employment backgrounds have similar retirement provisions.

Depending on the guarantee made to each employee group, the health premiums reimbursed at age 65, once the retiree is eligible for Medicare, may drop to the amount of the Medicare supplemental premium.

Also, the school district is required to pay CALPERS a minimum monthly benefit of \$110.10 per month per retiree.

---

## DISCLOSURES AND LIMITATIONS

The results in this report are based on information and data submitted by the San Leandro Unified School District. An audit of the information was not performed by ALI Actuarial & Retirement Plan Services. The results depend on the accuracy and completeness of the underlying information, including: demographic information on the covered work force and current retirees; eligibility provisions; health care premiums; and actuarial assumptions.

The results in this report are estimates based on assumptions about future events. Assumptions may be made about participant data or other factors and are so noted. Inclusion or exclusion of insignificant items affecting actuarial liabilities is based on information provided by the Employer. ALI Actuarial is not liable for any errors in the data provided.

Future experience will likely differ from the assumptions used in these calculations. As these differences arise, the expense for accounting purposes will be adjusted in future valuations to reflect the true experience.

All assumptions used in the valuation were either: chosen by the Employer, as noted; chosen by ALI Actuarial, as needed; or otherwise follow standard guidance provided by GASB 75 with respect to such assumptions.

---

## **GASB 75 TERMINOLOGY**

### **Total OPEB Liability (TOL)**

The actuarial present value of future benefits, based on employees' service rendered to the measurement date, using the Projected Unit Credit actuarial cost method. Cost under this method is prorated by service to date as a percentage of total expected service for each individual.

### **Normal Cost or Service Cost**

The present value of future benefits earned by employees during the current fiscal year. It is that portion of the Actuarial Present Value of benefits and expenses which is allocated to the current fiscal year by the Projected Unit Credit actuarial cost method.

### **Net OPEB Liability**

The excess of the TOL over the value of plan assets. In an unfunded plan (like this one), the plan assets are zero, so the TOL is always equal to the Net OPEB Liability.

### **Annual Required Contribution (ARC)**

The amount of cash contributions "required" by GASB 75 to soundly fund the plan over the working lifetime of the eligible employees. If funded, the ARC's paid over all years, and the investment income derived from their accumulated asset value, would be sufficient to pay all future benefits and expenses of the plan.

The ARC is equal to the Normal Cost + amortization of the Net OPEB Liability, plus an interest adjustment to year-end. The amortization period is based on the expected future lifetimes of the covered participants.

### **Net OPEB Obligation (NOO)**

The cumulative difference between past amounts expensed over contributions (premiums) paid. If expense exceeds contributions, this is a liability - otherwise it is an asset. This item is represented as a balance sheet liability or asset in the Statement of Net Assets.

### **Annual OPEB Cost**

An accrual basis measure of the periodic cost of a participant in a defined benefit OPEB plan, also referred to as the "expense". It is an annual charge to the income Statement.
